

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

of the California Academy of Sciences and that of Cornell University furnished each additional material of interest.

Of private collections, that of Walter Deane, though of limited range, contains the finest specimens from the Eastern States, some of them of matchless perfection, in all 39 specimens; that of Professor D. C. Eaton is very rich in forms, with 77 specimens; that of Mr. Davenport with 44 specimens from this group, many of which are scrappy, contains a number of interesting forms; these together with 112 specimens in our own herbarium, to say nothing of literally thousands of specimens examined in the field have furnished the data for this paper. Very much is yet to be known, particularly of the species of Mexico, West Indies, and South America.

COLUMBIA UNIVERSITY,
1 August 1898.

A Correction.

In the March number of the BULLETIN an unfortunate error occurred resulting in the necessity of renaming a species there described. We suggest the following emendation:

SELAGINELLA ARENICOLA Underw.

Selaginella arenaria Underw. Bull. Torr. Bot. Club, 25: 129, 1898, not *S. arenaria* Baker.

L. M. UNDERWOOD.

8 OCTOBER 1898.
